

## About us

Pharmacy Reviewer was created as the internet's first free worldwide medicine price comparison and online pharmacy reviews site.

The free drug price comparison tool on the front page of pharmacyreviewer.com lets visitors compare prices on over 100 drugs to find the cheapest online pharmacy to order from. And best of all, only reliable pharmacies are listed in the results!

The other big part of pharmacyreviewer.com is the online pharmacy reviews section, which help our visitors avoid blacklisted pharmacies &ndash; the hundreds of websites out there who won't hesitate to rip off unwitting customers.

In an industry dominated by spammers we want to make buying from pharmacies safer. And best of all pharmacyreviewer.com is completely free to use. Please email us using the contact form if there is a pharmacy that has ripped you off you think we should blacklist, and we will investigate. Also, if you have used one of the pharmacies reviewed by us on this site, please add your own review telling us about your experience. Lastly, if you like the site, please tell your friends!

The PharmacyReviewer Team
